

Brand Guidelines.

Welcome to the **Baseline Analytics** Brand Guidelines.

These guidelines help us keep our brand clear and consistent across everything we show.

At Baseline, we're all about building transparent, data-driven intelligence systems that empower every athlete to own their progress.

Inside this guide, you'll find everything you need to use our logo, fonts, colors, and brand assets the right way.

Table of Contents

The Table of Contents provides a structured guide to Baseline's visual identity, ensuring consistency in how our brand looks, feels, and communicates across all platforms.

- 00 Introduction
- 01 Logo Design
- 02 Brand Colors
- 03 Typography
- 04 Brand Asset
- 05 Applications

Baseline is a **mission-driven sports data brand** that helps athletes and coaches gain clarity through actionable **intelligence**, objective evaluation, and a fully integrated ecosystem designed to dismantle the industry's fragmented status quo.

About Baseline Analytics

Baseline Analytics

- Baseline delivers structured, data-led intelligence systems that turn raw performance metrics into clear, actionable progress.

Brand Voice

- **Clear & Athlete-Focused** — Communicates with Baseline precision, translating complex performance data into understandable direction.
- **Confident & Purposeful** — Speaks with authority and objectivity, backed by consistent standards and reality-based evaluation.
- **Empowering & Wise** — Feels like a conversation with an older, more experienced version of oneself, guiding athletes to stop guessing and start knowing.

Tone of Voice

Tone of voice is the way a brand communicates its personality, values, and attitude through words. It shapes how messages are perceived, ensuring consistency across all platforms.

01 Logo Design

The logo is constructed from foundational, measurable forms that represent objective **performance evaluation** and the clear **trajectory** of athlete progress.

A logo full lockup is the complete, final version of a **Baseline Analytics's logo**, including all its elements arranged in a fixed composition.

Full Lockup

The logomark is the symbol or icon of Baseline Analytics, used without text. It's a visual identifier that **represents the brand on its own**, used for simplicity and instant recognition.

Logomark

The alternate mark featuring **Baseline Analytics** maintains the brand's identity while ensuring clarity. It is designed for official use and **where the full name** is wanted to be shown.

Alternate Lockup

Lockups

The lockups define the correct proportions and spacing to maintain brand recognition and visual balance in various use cases.

Logo in Monochrome

A monochrome logo is a version of a logo that uses only one color typically black, white, or a single brand color without gradients or multiple hues.

This ensures Baseline Analytics and versatility across media where color isn't available, making it ideal for print, embossing, and high-contrast applications.

Logo with Asset

This combination reinforces brand identity, adds depth to the design, and enhances recognition while maintaining a cohesive and professional look across applications.

Baseline Analytics turns athlete performance data into clear, measurable insight so progress is understood, not guessed.

Every Athlete
Deserves a **Baseline**

Logo on Background

When the logo is applied on photographs, it should be applied in a way that maximizes contrast, depending on the brightness of the background. If the background colors clash with the color version of the logo, use the monochrome version instead.

Placement lockups define the fixed positioning of a logo in relation to the layout.

- 1. Square:** The default option would be to place the logo on the bottom right of layout.
- 2. Landscape:** When working with landscape layouts, we prefer to place our logo to the bottom right.
- 3. Tall Portrait:** If your content is vertically centered in a portrait frame, we prefer our logo to also be right aligned at the bottom.
- 4. Portrait:** Our default option would be to place our logo at bottom of layout. Preferably on the right.
- 5. Note:** These are the preferred positions. Feel free to place the logo on any corner of the layout if its deemed appropriate.

Clear Zones define the minimum margins that should be free of any other design element.

To define the clear zone, we use the 'Icon' from the Logo as approximate visual reference.

Logo incorrect usage refers to any alterations or modifications that compromise the integrity of a brand's logo.

Avoid Horizontal Stretching ❌

Avoid Vertical Stretching ❌

02 Brand Colors

Baseline's color palette balances warmth and contrast, combining grounded gold tones with deep black and soft neutrals. The palette reinforces clarity, credibility, and focus allowing data and insight to **stand out** without distraction across all environments.

Brand Colors

Black and the Sunglow Shades represent the authority, structure, and clarity of Baseline Analytics.

The Mercury and Limed Oak tones provide objective balance and focus , while the accent shades highlight athlete progress, actionable intelligence, and measurable performance trends.

Black & Sunglow are used to establish confidence and professionalism, echoing the brand’s "older and wiser" personality.

The brand is black dominant and should be used primarily on black backgrounds when in use.

They are the brand’s primary colors, forming the core of its visual identity.

PERKK Branding Studio

Every Athlete Deserves a **Baseline**

Baseline Analytics turns athlete
performance data into clear,
measurable insight so progress is
understood, not guessed.

04 Brand Asset

Brand Elements

Brand assets serve to create a consistent and recognizable visual identity across all touchpoints.

Every Athlete Deserves a **Baseline**

Baseline Analytics turns athlete
performance data into clear,
measurable insight so progress is
understood, not guessed.

The asset presents athlete data in a **structured**, repeatable pattern that emphasizes objectivity and control. Variations within the system highlight real performance differences while maintaining a reliable baseline for evaluation. It communicates **trust**, **precision**, and **analytical discipline**.

Brand Elements

This section is to show what the brand would demonstrate in the social media world, the brand asset is here to show how impactful it can be for the brands general look.
